## Stages of Education System in India

- **Pre- Primary** - It consists of children of 3-5 years of age studying in nursery, lower kindergarten and upper kindergarten. At this stage student is given knowledge about school life and is taught to read and write some basic words.
- **Primary** - It includes the age group of children of 6-11 years studying in classes from first to fifth.
- **Middle** - It consists of children studying in classes from sixth to eighth.
- **Secondary** - It includes students studying in classes ninth and tenth.
- **Higher Secondary** - Includes students studying in eleventh and twelfth classes.
- **Undergraduate** - Here, a student goes through higher education, which is completed in college. This course may vary according to the subject pursued by the student. For medical student this stage is of four and a half years plus one year of compulsory internship, while a simple graduate degree can be attained in three years.
- **Postgraduate** - After completing graduation a student may opt for post graduation to further add to his qualifications.

## Inclusiveness and Equity in Higher Education - Chapter 5

### Religious-group Disparities

Spanning the issue of inclusion, there is yet another consideration, namely, disparities between different religious groups. Table 5.01 presents information on religion-wise enrolment in graduation or higher courses.

The category of 'others' includes such religious groups as Zoroastrians, Jains, etc. who are, aggregate data show, educationally a shade better off. So is not however the case with relatively large groups, say, Hindus, Muslims, Christians and Sikhs. While Muslims rate lowest (GER, 6.84 percent), Christians appear to be comparatively better off (16.60 percent). For several socio-cultural reasons Muslims have lagged behind in education including in higher education. On the other hand, lower enrolment ratios among Hindus could be traced to depressed caste-groups within their fold.

These inter-group differences further stand out when examined for gender parity. In all the four religious groups, women are found trailing behind men (see Table 5.02). Except among Christians, male-female differences are highly pronounced. Perhaps in the households, education or schooling of girl-children is given a second priority. This kind of lower female representation is likely to be a big drag on the growth of higher education in the country.

## **Inclusiveness and Equity in Higher Education - Chapter 5**

### **Religious-group Disparities (contd. from previous slide)**

**Ordinarily Hindu religious-group is associated with caste-system, but other religious groups in India (e.g. Muslim, Christian, Sikh, etc.) have not remained insulated from the pervasive influence of caste-system. This is particularly true with those who opted for conversion or change of religion.**

**Several decisions of superior judiciary have recognised the reality of caste in other religious groups, and directed that these 'non-Hindu' caste-groups, too, could avail of various development and welfare schemes. Given this, it would be relevant to examine enrolment in these groups.**

**Table 5.04 brings out that, in terms of GER, the situation of Muslim OBCs is still lower than the parent group; and that of Scheduled Castes among Sikhs is but disquieting.**

**Source: NSSO 2004-05**

**Table 5.01: Enrolment\* Rates among Religious Groups**

Groups	Percentages		
	GER	NER	EER
Hindus	11.29	10.58	52.75
Muslims	6.84	6.51	54.09
Christians	16.60	15.98	57.64
Sikh	15.40	14.51	49.38
Others	31.54	19.60	63.36
<b>Total</b>	<b>10.84</b>	<b>10.18</b>	<b>52.61</b>

\* Only graduation and above. GER – Gross Enrolment Ratio NER – Net Enrolment Ratio EER - Enrolment of Eligible Ratio
